### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicant's amendments and arguments filed 4/3/07 have been found to overcome the cited prior art and have been persuasive, respectively.

- With respect to the rejection based on JP 4-46246, it is agreed that JP 4-46246 does not teach or suggest the amended claimed features of "the rectangular support frame portion is closed in a circumferential direction thereof, while being open in its axial direction perpendicular to the first direction" and "the support frame member is deformed so that the first and second support sides are relatively displaced toward each other in order to pre-compress the elastic connecting member previously bonded by vulcanization to the support frame portion and the mass member."
- With respect to the rejection based on JP 2824382, it is agreed that JP 2824382 does not teach or suggest the amended claimed features of "the rectangular support frame portion is closed in a circumferential direction thereof, while being open in its axial direction perpendicular to the first direction" and "the support frame member is deformed so that the first and second support sides are relatively displaced toward each other in order to pre-compress the elastic connecting member previously bonded by vulcanization to the support frame portion and the mass member." Suzuki does teach a support frame portion being closed in a circumferential direction and the deformation of legs 33. However,

the support frame portion of Suzuki supports a free hanging mass member 41.

The deformation of the legs 33 would not be able to pre compress the rubber connecting members 43 as required in the claims of the instant invention.

- None of the cited prior art teaches or suggests the allowable features of “the rectangular support frame portion is closed in a circumferential direction thereof, while being open in its axial direction perpendicular to the first direction” and “the support frame member is deformed so that the first and second support sides are relatively displaced toward each other in order to pre-compress the elastic connecting member previously bonded by vulcanization to the support frame portion and the mass member.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lan Nguyen whose telephone number is (571) 272-7121. The examiner can normally be reached on Monday through Friday, 7:30am to 4:00pm.
